

CITIMAX HIGH-CAB RANGE

*Ultra Slim Condenser with Huge Cooling Capacity
Specially Designed for High-Cab Heavy Truck Reefer*

Design Patent Number ZL202130055346.2

Model	Citimax1000	Citimax1100
Cooling Capacity (0°C/30°C)	7,900W	10,200W
Cooling Capacity (-20°C/30°C)	3,800W	5,100W
Heating Capacity (12°C/-20°C)	7,400W	7,600W
Air Flow	3,300 (m ³ /h)	
Compressor	Carrier 210	Carrier 310
Condenser	1780×304×388 (W×H×D,mm)	
Evaporator	1560×225×689 (W×H×D,mm)	
Weight	99KG	
Voltage	24V	
Current	34A	

As new members of the Citimax range, the Citimax high-cab models continues the reliability, capability, and accurate temperature control.

The major feature of Citimax high-cab range is the compact condenser, providing customers with easy installation and flexibility. The evaporator is ultra-thin design for more loading. Sufficient air flow and strong air speed guarantee the accuracy of temperature control in the box.

► Slim Condenser for More Flexibility

Ultra-slim and compact design requests less space which makes it fit to almost every high-cab truck.

► Strong Capacity & Fast Pull Down

Strong capacity guarantee a faster pull-down speed. Sufficient air flow provides a better air distribution and temperature accuracy.

► Upgrades for Easy Installation

Part of hose fittings are pre-assembled to improve the installation quality and reduce on-site work.

Multiple compressor accessories which can provide the proper solution for various applications.

Better water drain, better goods safety thanks to hydrophilic fins and the new skin design of evaporator.

► Control & Accuracy

Box temperature control range: -29°C~30°C.

Temperature control accuracy: +/- 1°C.

Sufficient heating capacity protects your goods from extreme low ambient.

Upgraded defrost function ensures stable box temperature during defrosting which is critical for sensitive goods.

► Proven Reliability

The Citimax range benefits from over 200 million running hours in on-site applications.

Developed by the Carrier Global R&D Center, the Citimax range uses proven refrigeration industry components.

The Carrier Transicold quality process certifies the conformity of all components of units.
